INTRODUCTION

The Bureau of Health Care Delivery and Assistance (BHCDA) administers the Community Health Center grant program, which is authorized under Section 330 of the Public Health Service Act, as amended. These centers provide comprehensive health services to urban and rural areas where there are shortages of medical personnel and services. Centers stress coordinated, comprehensive, personal care to meet the individual needs of patients. Patients pay for the services received according to a fee schedule based on ability to pay.

This directory lists the community health centers funded under Section 330 of the Public Health Service Act as of April 1985. A listing of State and regional primary care associations is also included.

The staff of the National Clearinghouse for Primary Care Information (NCPCI) compiled this directory based on information provided by the ten DHHS Regional Offices and the individual community health center grantees. This directory lists community health center grantees arranged by DHHS Region, and alphabetically within region by State, city, and organization name. The formal name of the grantee appears in bold type. If applicable, the common name or project name is enclosed in parentheses. The address, telephone number, and Bureau's Common Reporting Requirements (BCRR) number are provided for each grantee. The directory also includes satellite sites or clinics affiliated with the grantee. The names and addresses of these sites follow the centers with which they are affiliated. If a clinic site is not supported by 330 funds, the funding source is indicated. Clinic sites not supported by Federal funds may or may not offer services to patients on a sliding fee schedule.

The directory will be updated annually; additions, deletions, or changes should be directed to:
